

I am writing because I am concerned over the fact that radio stations that my friends, family and myself listen to, K-love=91.1 88.3 and 88.5 on my local dial, may be displaced by LPFM stations. This would have a devastating effect on those within my community. This station is a great encouragement to me throughout the day, I listen to it non-stop and taking it away would leave me without a radio station that I feel is beneficial to myself and is safe for my whole family to listen to. I support K-LOVE 100% and am pleading with you not to replace the station with a LPFM station. K-LOVE provides the community with something that other local stations do not. They supply music and information that cannot be found anywhere else locally. Unlike other radio stations I do not have to worry about what my family and friends will hear because I know that there is no foul language, no sexual content and no commercials to interrupt or distort my listening pleasure. As a christian this station gives me a venue to listen to the type of music that I prefer and I felt that it supports my first amendment rights. Thank you for your time, please reconsider removing K_LOVE from the air and replacing it with a LPFM station.
